

Electric Insect Killer with UV Light

This electric insect killer eliminates flying insects using UV light. Insects are drawn to the light and then electrocuted by a high-voltage grid.

Product Overview

Effective Insect Control Solution

The Electric Insect Killer JS30-9W is a reliable consumer electronics solution designed to eliminate flying insects efficiently. Utilizing an internal ultraviolet light source, the device attracts pests into a high-voltage grid for immediate removal. Built with durable materials, it is engineered for both indoor and outdoor environments, ensuring long-lasting performance and easy maintenance.

Technical Specifications

Power Rating

9 W

Rated Power

Usage Environment

Indoor, Outdoor

Power Source

Standard AC Power

Design & Build

Key Design Features

- Cylindrical protective cage
- Ultraviolet (UV) light attraction
- High-voltage electrocution grid
- Easy cleaning and maintenance design

Build Quality

Durable Construction • Low Maintenance
