Overview

Efficient Insect Control

This electric insect swatter offers a simple and stylish solution for managing flying pests. Designed for both indoor and outdoor use, it features a triple-layer mesh construction that ensures user safety while delivering an effective high-voltage charge to eliminate insects on contact. With a rechargeable lithium battery and convenient USB charging, this device provides reliable, long-lasting performance for home pest control.

Technical Specifications

Model	YG-D006
Battery Capacity	1200 mAh
Battery Type	18650 Lithium Battery
Charging Time	4 h
Usage Duration	27 days

Features

Key Features

- Energy Ring working indicator
- Low power alarm
- Quick touch switch for rapid activation
- Wireless charging dot

Safety Features

Triple-layer mesh, Safety nets, Low-current high-voltage
