

Electric Instant Noodle Production Line

This electric instant noodle production line features advanced technology and a compact structure for stable performance. It achieves high automation, convenient operation, and low energy consumption, completing all working procedures from feeding flour to finished products in one process.

ADDITIONAL IMAGES

Product Overview

A fully automated electric instant noodle production line designed for continuous manufacturing.

High-Efficiency Instant Noodle Production

This electric instant noodle production line offers a compact, automated solution designed for small to medium-sized enterprises. Featuring stable performance and a small floor space requirement, the system manages the entire process from raw flour input to the final packaged product. With adjustable shaping and cutting capabilities, it allows for the production of various noodle shapes and sizes, making it a versatile choice for modern food processing facilities.

Technical Specifications

全自动小型方便面生产线_04

食品样品 Food sample

High-quality electric instant noodle line designed for efficient and reliable production.

Production Capacity

11000 pcs/8h

Output

Process Flow

- Flour mixing
- Compounding
- Boiling
- Cutting and bending
- Frying
- Cooling
- Packaging

Power Requirements

380V / 50Hz (Three Phase), 220V / 50Hz (Single Phase)

Compatible Raw Materials

Wheat flour

Model Comparison

Technical Specifications by Model

Model	Installed Power	Power Consumption	Capacity
MTE-1	85kw	50kw	11000pcs/8h
MTS-1	10kw	10kw	11000pcs/8h

Features

Noodle Shapes

Round • Square • Rectangle

Automation

Yes
