

Electric Jigsaw with Variable Speed

This electric jigsaw is designed for precision cutting across various materials. It features variable speed control, an adjustable base plate, and a quick blade change system.

Overview

High-Performance Electric Jigsaw

This versatile electric jigsaw is engineered for precision cutting across wood, steel, and other materials, making it an essential tool for professional workshops and demanding projects. It features a powerful 620W motor and a 6-speed variable control system, allowing users to match the blade speed to the specific material density for optimal results. With user-focused enhancements like a built-in laser guide, 3-position pendulum action, and an adjustable base plate, this tool ensures both accuracy and comfort during extended operation.

Technical Specifications

Motor Power	620 W
Speed Range	500 - 3000 rpm
Pendulum Positions	3

Cutting Capacity

Cutting Capacity by Material

Material	Capacity (mm)
Wood	65 / 70 / 80
Steel	8 / 10 / 10

Features

Key Features	Variable 6-Speed, Built-in Laser, Adjustable Base Plate (45°), Soft Grip Handle
--------------	---

Physical Properties

Plug Standard	VDE Plug
Cable Length	2 m
