

Electric Juice Extractor

This electric juice extractor efficiently processes fruits and vegetables. It provides fresh juice by separating the pulp.

Product Overview

Compact Electric Food Processor

This electric juice extractor and food processor is designed for efficiency in small-batch food preparation. Featuring a durable white housing and a transparent bowl, it allows for easy monitoring of ingredients during chopping and pureeing. The unit is equipped with a safety interlock mechanism and a pulse function, providing users with the precision control needed for consistent results.
