

Electric Kettle for Boiling Water

This electric kettle is designed for efficiently boiling water. It is suitable for quickly preparing tea, coffee, and other hot beverages.

Product Overview

Professional Grade Boiling Solution

This high-quality stainless steel kettle is engineered for efficient water boiling and versatile kitchen performance. Built with durable, polished stainless steel, it ensures even heat distribution and long-lasting reliability in demanding environments. The design includes an ergonomic handle for a secure grip and a precision-fitted lid to optimize moisture and heat retention.

Technical Specifications

Material	Stainless Steel
Finish	Polished

Compatibility

Compatible Stovetops	Induction, Gas, Electric, Ceramic
