

Electric Kettle for Rapid Water Boiling

This electric kettle is designed for efficient and rapid water boiling. It features a stainless steel body for durability and easy cleaning, along with a visible water level indicator and automatic shut-off function.

Product Overview

Efficiency Meets Durability

This electric kettle is engineered for rapid water boiling, making it an essential appliance for high-demand environments. Constructed with a robust stainless steel heating element, it ensures longevity and consistent performance. With integrated safety features like automatic switch-off and boil-dry protection, this unit combines professional reliability with user-friendly operation.

Technical Specifications

Power Output

1850 W

Min Power

2200 W

Max Power

Voltage

220-240V

Frequency

50/60Hz

Design & Features

Key Features

- Automatic switch-off
- Boil dry protection
- Power indicator light
- Water level indicator

Base Design

360-degree turnable base

Heating Element

Stainless steel concealed

Compliance & Connectivity

Plug Type

VDE French Plug
