

# Electric Kettle with Ceramic Teapot Design

This electric kettle is designed for efficient and convenient boiling. It features a ceramic teapot design on a matching base.

## Product Overview

### Traditional Design Meets Modern Efficiency

This electric kettle combines traditional aesthetics with modern heating technology. Featuring a purple clay inner pot, it is designed to enhance water quality for a cleaner, sweeter taste. The unit utilizes a durable microcrystal glass heating panel and an advanced light wave structure to ensure rapid and efficient performance.

## Key Features

### Heating Technology

Microcrystal Glass Panel • Light Wave Heating

### Material Benefits

Purple Clay Inner Pot, High-Temperature Burned, Water Quality Activation

## Performance

### Boiling Performance

**8 minutes**

Boiling Time

## Design

### Design Style

Ceramic Teapot Design
