Electric Kettle with Plastic Housing

This electric kettle is constructed with a plastic housing. It features a water level indicator for easy filling and a rapid heating element.

Product Overview

Efficient Daily Boiling Solution

This 1.7-liter electric kettle features a durable plastic housing designed for reliable daily use. It is equipped with essential safety features including dry boil protection and an automatic shut-off function once the water reaches a boil. With a 360-degree cordless design and a removable, washable filter, it offers both convenience and easy maintenance for any kitchen environment.
