

Electric Kettle with Stainless Steel Body

This electric kettle is designed for efficient and rapid water boiling. It features a durable stainless steel body, a convenient water level indicator, and a heat-resistant handle.

Overview

Modern Smart Electric Kettle

The T-9017WF is a high-performance electric kettle featuring a durable stainless steel body and a 1.7-liter capacity, ideal for both home and professional environments. It integrates smart technology via the TUYA APP, allowing for precise temperature adjustments between 40-100°C and a dedicated keep-warm function. Designed with safety and convenience in mind, it includes boil-dry protection, automatic shut-off, and a 360° rotational base with integrated cord storage.
