

Electric Knife Sharpener Tool

This electric knife sharpener features a compact design with sharpening slots and an on/off switch. It is designed for sharpening various types of knives quickly and efficiently, restoring their cutting edge with ease.

Product Overview

Professional Two-Stage Sharpening Solution

The KS-280 electric knife sharpener is a versatile tool designed to restore the cutting edge of non-serrated blades efficiently. Featuring a durable ABS plastic housing with a sleek silver coating, this device utilizes high-quality brown fused alumina sharpening stones for precision results. Powered by a reliable shaded pole motor, it offers a consistent and eco-friendly sharpening experience suitable for various kitchen environments.
