

Electric Lawn Scarifier with Collection Bag

This electric scarifier is designed for lawn maintenance, removing thatch and moss to promote healthy grass growth. It features a cylindrical roller with blades or tines that rotate to aerate the soil and remove debris, and includes a collection bag for easy disposal.

Overview

Professional Lawn Maintenance Solution

This electric lawn scarifier is engineered to revitalize lawns by effectively removing thatch and moss, promoting healthier grass growth. Equipped with a powerful electric motor and a specialized cylindrical roller, it ensures consistent performance across various lawn conditions. Its user-friendly design includes adjustable depth settings and a convenient collection bag, making it an essential tool for efficient garden maintenance.

Technical Specifications

Power Source	Electric
Key Features	Thatch Removal, Moss Removal, Adjustable Depth, Electric Motor

Design & Usability

Design Highlights

- Lightweight construction
- Folding handle for storage
- Integrated collection bag
- Cylindrical roller mechanism
