

Electric Lifting Hoist with Remote Control

Electric lifting hoist is designed for vertical lifting. It features a robust motor, durable cable system, and a remote control for safe operation.

Product Overview

Electric Lifting Hoist

This electric lifting hoist is engineered for reliable vertical lifting applications in diverse environments. It features a robust motor and a durable cable system designed to withstand demanding tasks. For enhanced safety and operational convenience, the unit includes a remote control pendant, an integrated safety hook, and built-in overload protection, making it suitable for workshops, garages, and construction sites.

Key Features

Key Features

Remote Control, Overload Protection, Safety Hook, Vertical Lifting

Application

Suitable Environments

- Workshops
- Garages
- Construction Sites
