

Electric Log Splitter

This electric log splitter is designed for efficient and safe wood splitting. Its compact design and built-in wheels allow for easy transportation and storage.

Product Overview

High-Efficiency Electric Log Splitting

This powerful electric log splitter offers a convenient and reliable alternative to traditional gas-powered tools, eliminating the need for complex engine maintenance. With a robust 5-ton force delivered through a precision hydraulic ram, it simplifies heavy-duty wood processing safely and efficiently. Designed with user safety at the forefront, the dual-hand operation mechanism ensures maximum protection during use.

Performance Specifications

Splitting Force

5 ton

Force Capacity

Technical Details

Hydraulic Cylinder Diameter	55 mm
Power Source	Electric

Safety & Construction

Design Highlights

- Compact design for storage
- Integrated transport wheels
- Enclosed hydraulic ram

Safety Features	Two-Hand Safety Control, Safety Guards
Construction Material	Welded Steel
