

# Electric Marine Capstan Winch

This electric capstan winch is designed for marine applications such as mooring and anchoring. It features robust construction and an electric motor for efficient, controlled operation.

## Product Overview

### Heavy-Duty Electric Marine Capstan

This robust electric capstan is engineered specifically for demanding marine environments, providing reliable performance for mooring, anchoring, and various shipboard operations. Designed for efficiency and control, the unit features a high-torque motor and a durable drum construction to withstand harsh conditions. Its weatherproof enclosure and thoughtful design ensure straightforward installation and long-term maintenance reliability.

## Technical Specifications

### Key Features

- High-torque motor
- Durable drum construction
- Weatherproof enclosure
- Ease of installation
- Low maintenance requirements

<b>Power Source</b>	Electric
<b>Primary Applications</b>	Mooring, Anchoring, Shipboard Operations
