Overview

Efficient Material Handling Solution

This ride-on electric tow tractor is engineered for seamless material handling and towing applications in industrial environments. Designed for easy handling and maneuverability, it offers a clean, emission-free alternative to traditional towing equipment. With its specialized design for platform carts, this tractor is an ideal choice for warehouses and factories looking to optimize logistics and internal transport.

Technical Specifications

Model Number	VH-ETA
Drive Type	Electric
Operation Mode	Ride-on

Features

Key Benefits	Emission-free, Easy handling, Green product, Indoor/Outdoor use
Primary Application	Tracting platform carts
