

Electric Material Tow Tug

This electric tow tug is a compact and versatile solution for moving materials in industrial and commercial environments. Designed for ease of use, it features a robust electric motor, providing ample power for towing carts, equipment, and other loads.

Overview

Compact Material Handling Solution

The Electric Material Tow Tug is a versatile and compact solution engineered for efficient material transport in industrial and commercial settings. Designed for high maneuverability in confined spaces, this unit features a robust electric motor and heavy-duty tires to ensure reliable traction and performance. It is an ideal choice for warehouses, hospitals, and airports looking to enhance productivity while reducing the physical strain of manual labor.

Technical Specifications

Model	ETM-100
Traction Capacity	1000 Kg
Max. Travel Speed	6 Km/h

Power System

Driving Motor	DC24V/500W
Battery Configuration	2x12V/70Ah
Charger Output	24V/10Ah

Performance Metrics

Core Performance

1000 Kg

Load Capacity

6 Km/h

Max Speed

500 W
