

Electric Meat Chopper with Glass Bowl

This electric meat chopper features a stainless steel housing. It is a multi-functional device capable of ice crushing.

Product Overview

Efficient Food Processing

This electric meat chopper is engineered for high-performance food preparation, making it a versatile tool for any commercial or professional kitchen. It features a robust, durable motor paired with high-quality stainless steel blades to ensure consistent and effective chopping results. The transparent glass bowl allows for precise monitoring of the contents during operation, while the compact design maximizes workspace efficiency.

Technical Details

Bowl Material	Glass
Blade Material	Stainless Steel

Key Features

Primary Use	Meat Chopping • Food Processing
Design Features	Compact Design, Transparent Bowl, Electric Operation
