

Electric Meat Grinder with Die-Cast Aluminum Housing

This electric meat grinder features a durable die-cast aluminum housing. It offers on/off and reverse functions, with metal gears and an easy-to-assemble grinder head.

ADDITIONAL IMAGES

Overview

Durable die-cast aluminum housing designed for household meat processing.

High-Performance Electric Meat Grinder

This robust electric meat grinder features a durable die-cast aluminum housing designed for reliable household use. It is equipped with a powerful DC motor and an innovative metal gear system, ensuring efficient processing with a low noise level of under 68dB. The unit offers versatile functionality including meat grinding, sausage making, and kibbeh preparation, with optional accessories available for vegetable slicing and tomato processing.

Technical Specifications

Powerful DC motor and robust metal gear system ensure reliable performance.

Power & Performance

2000 W

Max Lock Power

1.8 kg/min

Output Capacity

68 dB

Noise Level

Electrical

- Voltage: 100-240V
- Frequency: 50Hz/60Hz
- Motor Type: DC Motor

Construction & Design

Features include a fast-lock head, sliding spline shaft, and low-noise design.

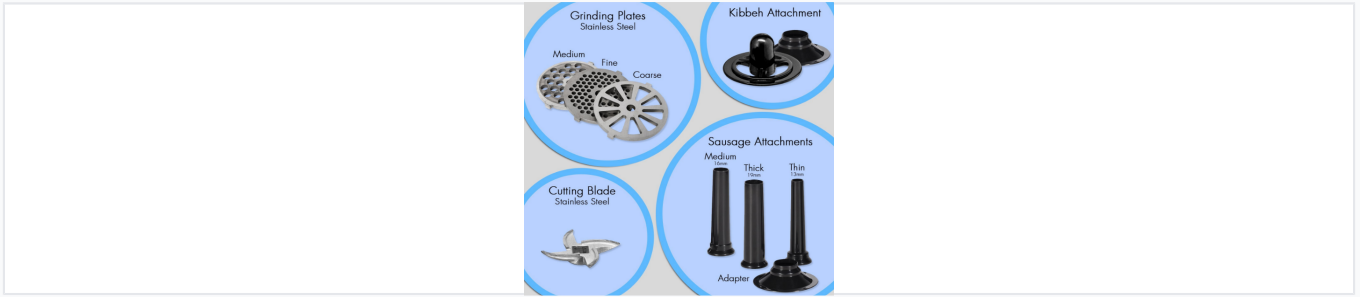

Materials & Build

- Housing: Die-cast aluminum
- Gears: Metal
- Gear Box: Metal
- Blade: Stainless steel
- Cutting Plates: Metal alloy

Design Features

Backside air scoop, Non-slip rubber feet, Sliding spline shaft connection, Lock catch mechanism

Functionality & Accessories

Includes various grinding plates, sausage attachments, and kibbeh maker.

Core Functions

Meat Grinding • Sausage Making • Kubbe Preparation

Cutting Plates

Plate Type	Diameter
Fine	4mm
Normal	7mm
Coarse	Triangle

Compliance

Certifications	CB, CE, GS, RoHS
