

# Electric Meat Grinder with Stainless Steel Housing

This electric meat grinder is designed for home use and features a durable stainless steel construction for the grinding head, feed tray, and housing. It is equipped with a powerful motor for efficient meat processing and includes multiple grinding plates for varying degrees of fineness.

## Product Overview

### Professional Home Meat Processing

This electric meat grinder features a durable stainless steel housing and grinding components, designed specifically for efficient home meat processing. It combines a powerful motor with built-in safety features like a circuit breaker to ensure reliable performance and motor longevity. With multiple grinding plates included, it offers the versatility needed to prepare fresh ground meat for burgers, sausages, and various culinary applications.

## Performance & Safety

### Performance Highlights

#### 1 Circuit Breaker

Motor Protection

### Safety Systems

Built-in circuit breaker to prevent motor burnout

## Construction

### Build Materials

Stainless Steel Housing, Stainless Steel Grinding Head, Stainless Steel Feed Tray

## Functionality

### Grinding Plates

- Multiple plates for varying fineness
- Easy-to-use on/off switch
- Compact design for storage

## Applications

### Culinary Applications

Burgers • Sausages • Home Use • Fresh Ground Meat
