Overview

Precision Electric Metal Shearing

This electric metal shearing machine is engineered for high-precision cutting in professional metalworking environments. It features a robust construction designed for durability, complemented by a mobile 24V foot switch for safe and efficient operation. With integrated manual back gauge controls and automatic sheet holding, it ensures accurate and repeatable results for various industrial applications.

Technical Specifications

Performance Metrics

3 mm

Max Shearing Thickness

1250 mm

Max Shearing Width

3 kW

Motor Power

30 min

Strokes per Minute

Technical Details

Feature	Specification
Item Number	386101
Model	Q11-3x1250
Shearing Angle	2°
Back Gauge Range	630 mm
Net/Gross Weight	980 / 1140 kg
Packing Dimensions	184 x 103 x 135 cm

Features & Equipment

Standard Accessories

- Shearing blade
- 24V mobile foot pedal switch
- Back gauge

Key Machine Capabilities

Manual back gauge, mm-counter, Cutting line lighting, Bench angle-stop, Automatic rubber-coated sheet hold

Certifications

Industry Compliance

CE • ISO • TUV • SUD
