Product Overview

Professional Milk Frothing Solution

This versatile electric milk frother is designed for both hot and cold milk preparation, making it an essential tool for crafting cappuccinos, lattes, and specialty coffee drinks. Featuring a double-wall jug design and a 450W motor, it efficiently heats milk to approximately 65°C in about one minute. With user-friendly one-touch operation, automatic shut-off, and a non-stick interior, this device offers both convenience and reliability for commercial or home use.
