

Electric Misting Fan for Personal Cooling

This electric fan provides both air circulation and a cooling mist. It is designed to create a more comfortable environment in indoor settings.

Product Overview

Advanced Personal Cooling Solution

The 701A mist fan is a specialized household electrical appliance engineered for effective air conditioning and ventilation. By integrating advanced misting technology with standard fan circulation, it creates a refreshing and comfortable environment, particularly in hot and dry climates. Its compact design makes it an ideal choice for localized cooling in various indoor settings.

Technical Details

Model Number	701A
Primary Function	Air conditioning and ventilation
Cooling Method	Electric Fan, Mist Generation

Usage Guidelines

Safety Instructions

- Read instructions before operation
- Handle appliance with care
- Ensure proper setup for misting function
