

Electric Motor for Assembly Line Machinery

This electric motor is designed for assembly line and production line machinery. Its compact design includes exposed copper windings and a sturdy frame for versatile integration.

Product Overview

Industrial-Grade Assembly Line Motor

This robust electric motor is specifically engineered for demanding assembly line and production line machinery. Featuring a compact, durable design with exposed copper windings and a sturdy frame, it ensures reliable and consistent performance in industrial environments. The unit includes multiple connection points, allowing for versatile integration into existing manufacturing systems.

Technical Specifications

Sample Reference	4-A
Revision	1
Date Code	3/16/05

Design Features

Best For

Assembly Lines • Production Machinery • Industrial Environments

Construction Highlights

Compact Design, Exposed Copper Windings, Sturdy Frame, Multi-Point Connection
