

# Electric Motor for Machinery

This electric motor is designed for general machinery applications. It features a durable construction with cooling fins for efficient heat dissipation.

## Product Overview

### Robust Electric Motor for General Machinery

This electric motor is engineered for reliability and performance in a wide range of general machinery applications. Featuring a durable construction with integrated cooling fins, it ensures efficient heat dissipation even during extended operation. Its distinct blue finish and yellow shaft design make it easily identifiable in industrial settings.

## Physical Characteristics

### Construction

Robust • Durable

### Color Finish

Blue body with yellow shaft

### Cooling Method

Integrated cooling fins

## Applications

### Primary Application

General Machinery, Industrial Equipment
