

Electric Motor for Oil Pumps

This electric motor is specifically designed for oil pump applications. It features cooling fins for efficient heat dissipation and a sturdy base for secure mounting.

Product Overview

High-Performance Oil Pump Motor

This three-phase asynchronous electric motor is engineered specifically for demanding oil pump applications. Featuring a robust construction with integrated cooling fins, it ensures efficient heat dissipation and reliable operation under continuous load. The unit is designed for durability, finished with a corrosion-resistant blue coating, and includes practical features such as a sturdy mounting base, a secure terminal box, and a lifting eye for easy handling and installation.

Technical Specifications

Motor Type	Three-phase asynchronous motor
Country of Origin	China

Design & Construction

Cooling Method	Integrated cooling fins
Finish	Blue corrosion-resistant paint
Key Features	Robust construction, Sturdy mounting base, Terminal box included, Lifting eye
