

Electric Motor for Textile Machinery

High-performance electric motor designed for textile machinery applications. It features a finned housing for efficient heat dissipation and is engineered for reliable and continuous operation.

Product Overview

Industrial-Grade Textile Motor

This high-performance electric motor is specifically engineered for the rigorous demands of textile machinery applications. Featuring a robust construction with an advanced finned housing, it ensures superior heat dissipation for reliable, continuous operation. Its versatile flange mount design and precision-engineered shaft allow for secure installation and seamless integration with various textile machine components.

Technical Features

Build Quality

Heavy Duty • Robust Design

Cooling System

Finned housing for enhanced thermal dissipation

Mounting Type

Flange mount

Industry Suitability

Textile Machinery, Industrial Automation, Continuous Duty
