

Electric Motor for Textile Machinery

This high-efficiency electric motor is specifically designed for textile machinery applications. It features a robust construction with a flange mount and a ribbed housing for optimal heat dissipation.

Product Overview

High-Efficiency Textile Machinery Motor

This electric motor is engineered specifically for the demanding requirements of textile machinery. It features a robust, enclosed construction designed to provide reliable performance in harsh industrial settings. The integrated ribbed housing ensures optimal heat dissipation, significantly extending the service life and operational efficiency of the unit.

Technical Specifications

Mounting Type	Flange Mount
Housing Design	Ribbed Enclosure
Ideal Applications	Textile Machinery, Industrial Manufacturing, High-Dust Environments

Key Features

Performance Highlights

1 High

Efficiency Class

100 Optimized

Thermal Dissipation
