

# Electric Motor for Trolleys and Carts

This electric motor is designed for use in barrows, trolleys, and carts. It features a cylindrical body with cooling fins and a connector for cooling or drainage.

## Product Overview

### Versatile Electric Motor Solution

This electric motor is engineered specifically for mobility applications, making it an ideal choice for barrows, trolleys, and carts. Its robust design combines a durable aluminum body with efficient cooling fins to ensure reliable performance during operation. The unit is designed for straightforward integration, featuring a standard four-bolt mounting base for secure installation in various industrial and commercial equipment.

## Technical Specifications

### Cooling Features

- Integrated cooling fins
- Ventilated top housing
- Side hose connector

### Construction Materials

Aluminum, Plastic

### Mounting Configuration

4-bolt base mount

## Applications

### Compatible Equipment

Barrows • Trolleys • Carts
