

# Electric Motor for Woodworking Machinery

This electric motor is designed for heavy-duty applications in woodworking machinery. It features a robust cast metal housing with cooling fins and end shields for bearing protection.

## Product Overview

### Industrial Woodworking Motor

This high-performance electric motor is specifically engineered for the rigorous demands of industrial woodworking machinery. Constructed with a durable cast metal housing, the unit features integrated cooling fins that ensure optimal thermal management during heavy-duty operation. The design incorporates end shields to protect critical bearings and a convenient lifting lug to simplify installation and maintenance processes.

## Technical Specifications

### Installation Accessories

- Lifting lug for easy installation
- Simplified maintenance access

<b>Housing Material</b>	Cast Metal
<b>Cooling Mechanism</b>	Integrated Cooling Fins
<b>Safety and Protection</b>	Bearing Protection, End Shields, Heavy-duty Design
