Product Overview

High-Performance Urban Commuting

The TDR1930S is a premium electric motorcycle engineered specifically for efficient urban commuting and recreational riding. It combines a high-torque electric motor with a lightweight, aerodynamic frame to provide smooth, agile handling in city traffic. Featuring sustainable power delivery, advanced safety technologies, and a modern aesthetic, it offers a sophisticated transportation solution for the modern professional.

Technical Specifications

Key Performance Metrics

1 High-Torque
Motor System

Drive Integration

Rear-wheel integrated motor

Braking Technology

Regenerative Braking

Features & Design

Advanced Equipment

- Regenerative Braking System
- Integrated Lighting System
- Advanced Suspension System
- Digital User Interface

Ride Experience

Eco-Friendly • High-Performance • Agile Handling

Design Features

Aerodynamic, Modern Aesthetic, Green/White Scheme, Digital Display
