

Electric Motors for Fans, Pumps, and Appliances

These electric motors include shaded pole and induction types. They are designed for efficient and reliable performance in various applications, such as fans, pumps, and appliances.

Overview

High-Efficiency Electric Motors

These versatile electric motors are engineered for reliable performance in demanding applications such as fans, pumps, and various household appliances. The lineup includes both shaded pole and induction motor technologies, ensuring a solution for diverse operational requirements. Built with robust construction and optimized cooling systems, these motors are designed to deliver consistent power while meeting essential industry safety and performance standards.

Technical Specifications

Suitable Applications

- Fans
- Pumps
- Appliances

Motor Technologies

Shaded Pole Motor, Induction Motor

Performance & Build

Design Highlights

Robust Construction • Optimized Cooling • Industry Standard Compliance
