

Electric Mountain Bicycle with Hydraulic Disc Brakes and LCD Display

This electric mountain bicycle features a rear hub motor for assisted propulsion and hydraulic disc brakes for reliable stopping power. An LCD display allows riders to monitor performance metrics during off-road adventures.

Product Overview

High-Performance Electric Mountain Bike

This electric mountain bicycle is engineered for versatility and power, featuring a robust 6061-T6 aluminum alloy frame and a high-performance rear hub motor. Designed to tackle challenging terrain, it includes premium hydraulic disc brakes for superior stopping power and an integrated LCD display for real-time performance monitoring. With an impressive range of over 60 km per charge, this bike offers a reliable and efficient solution for both adventurous off-road riding and extended commutes.
