

Electric Mountain Bicycle with Pedal Assist

This electric bicycle is designed for various terrains, featuring a robust frame and front suspension. It is equipped with an electric motor and battery pack, providing pedal assistance for commuting and recreational riding.

Overview

Electric Mountain Bicycle

This electric mountain bicycle is engineered for versatility across various terrains, combining a robust, lightweight alloy frame with capable off-road features. Equipped with an integrated electric motor and battery system, it provides reliable pedal assistance suitable for both daily commuting and recreational trail riding. The design prioritizes performance and control with front suspension, disc brakes, and a multi-speed drivetrain.
