

Electric Non-Stick Frying Pan with Glass Lid

This electric frying pan features a stainless steel construction with a non-stick surface. It includes a transparent glass cover with vent holes and an adjustable temperature control.

Product Overview

Professional Electric Frying Solution

This electric frying pan is engineered for versatile cooking tasks, including frying, sautéing, and simmering. Constructed with durable stainless steel and a high-temperature resistant coating, it ensures longevity and consistent performance. The inclusion of a transparent glass lid with vent holes allows for precise cooking control, while the non-stick surface simplifies food release and cleanup.
