

Electric Non-Stick Frying Pan with Glass Lid

This electric frying pan is designed for versatile cooking. It features a non-stick cooking surface and a transparent glass lid for easy monitoring.

Product Overview

Versatile Cooking Performance

This electric frying pan is designed for versatile cooking in any kitchen environment. Featuring a high-quality non-stick surface, it ensures easy food release and effortless cleanup after every meal. The included transparent glass lid allows chefs to monitor the cooking process without losing heat, while the adjustable temperature control dial provides precise heat settings for a variety of culinary tasks.
