

Electric Oil Transfer Pump

This electric oil transfer pump is designed for effective and reliable fluid extraction. It is suitable for transferring various oils and fluids in industrial and automotive applications.

Overview

Professional Fluid Transfer Solution

This electric oil transfer pump is engineered for efficient and reliable fluid extraction in demanding industrial and automotive environments. It features a robust motor design paired with durable hoses and a precise dispensing nozzle to ensure controlled output. Equipped with a safety switch and a sturdy base, the unit provides both operational security and stability during heavy-duty use.

Key Features

Core Features

- Robust motor for reliable performance
- Includes durable transfer hoses
- Dispensing nozzle for controlled output
- Integrated safety switch
- Sturdy base for stable operation

Applications

Suitable Applications

Industrial Fluid Transfer, Automotive Maintenance, Oil Extraction
