

# Electric Orbital Sander for Wood Finishing

This power tool is designed for sanding surfaces to a smooth finish. It features a rectangular sanding pad, a plastic housing, and a handle with a trigger for operation.

## Product Overview

### High-Performance Orbital Sander

This electric orbital sander is engineered for precision wood finishing and surface preparation. Designed for handheld operation, it features an ergonomic handle and trigger mechanism for optimal control during extended use. The rectangular sanding pad ensures a consistent finish, making it an essential tool for professional woodworking and industrial surface refinement.

## Technical Specifications

### Sander Category

Orbital Sander • Finishing Sander

### Design Features

- Rectangular sanding pad
- Ergonomic handle
- Integrated trigger operation
- Handheld portable design

### Model Number

KD-180250A

### Power Source

Electric

### Primary Application

Wood Finishing, Surface Preparation, Industrial Smoothing
