

Electric Orbital Sander

This electric orbital sander is designed for sanding wood and other materials. It features a rectangular sanding base, a top handle with a trigger switch, and a power cord.

Product Overview

Professional Performance Sanding

This electric orbital sander is engineered for efficiency and precision in wood finishing applications. Featuring a durable rectangular sanding base, it ensures consistent material removal and a smooth, professional surface quality. The ergonomic top-handle design with an integrated trigger switch offers superior control, making it an essential tool for workshop and industrial surface preparation tasks.
