Product Overview

High-Performance Electric Outboard Solution

This electric outboard motor system is engineered for efficiency and reliability in marine environments. Featuring a brushless motor design and a robust 3-blade stainless steel propeller, it delivers consistent thrust and smooth operation. The system is designed for professional applications, offering customizable output options and durable construction for long-term use.

Technical Specifications

Rated Output

30 KW

Rated Output

Rated Voltage	380 VDC
Rated Speed	1400 rpm
Motor Type	Brushless Motor
Gear Position	CVT

Physical Properties

Blade Diameter	500 mm
Material Options	304 Stainless Steel, 316 Stainless Steel (Optional)
Weight	113 kg

Compatibility & Accessories

Available Accessories

- Battery
- Control Table
- Steel Brackets

Propeller Blade Supply

Material Type	Configuration
Stainless Steel	3-Blade
Aluminum Alloy	3-Blade
ABS Plastic	2 or 3 Blades
