

# Electric Outdoor Gazebo Heater

This electric gazebo heater is designed for outdoor use. It features a radiant heating element that provides warmth to surrounding areas.

## Product Overview

### Efficient Outdoor Heating Solution

The ZHQ2431 electric gazebo heater is a professional-grade solution designed to extend the usability of outdoor spaces during cooler months. Utilizing advanced radiant heating technology, this unit provides efficient, directional warmth to patios, gazebos, and similar outdoor environments. Its robust metallic frame and included mounting bracket ensure a secure and durable installation for long-term reliability.

## Technical Specifications

Power Source	Electric
Heating Technology	Radiant Heating
Installation	Wall Mountable, Ceiling Mountable
Frame Material	Metal

## Features

### Key Benefits

- Directional heat output for targeted comfort
- Durable metallic construction for outdoor longevity
- Includes dedicated mounting hardware
- Suitable for residential and commercial outdoor spaces
