

# Electric Oven Convection Fan Motor

This is a shaded pole motor used in electric ovens for convection fan operation. It features a robust construction with a metal frame, a steel shaft, and a stator winding.

## Product Overview

### High-Performance Convection Fan Motor

This shaded pole motor is engineered specifically for electric oven convection fan applications. Built with a robust metal frame and durable steel shaft, it ensures reliable operation even in demanding high-temperature environments. The design includes integrated mounting points to facilitate secure and straightforward installation within your appliance.

## Technical Specifications

### Environment Suitability

High-Temperature Resistant

Motor Type	Shaded Pole Motor
Key Materials	Metal Frame, Steel Shaft

## Installation

Mounting	Integrated mounting points for secure attachment
