

Electric Oven Shaded Pole Motor

This shaded pole motor is designed for use in electric ovens. It operates at 100-127V and consumes 4W of power.

Product Overview

High-Performance Oven Motor

This shaded pole motor is engineered specifically for reliable operation in high-temperature oven environments. It provides consistent torque for internal rotating components such as turntables and convection fan systems. Featuring a compact, robust build, this component is designed for long-term durability and efficient performance in professional and residential oven applications.

Technical Specifications

Model Number	725133500A
Voltage Range	100-127V
Power Rating	4 W
Motor Type	Shaded Pole

Compliance and Origin

Manufacturing Origin	China
----------------------	-------

Application

Primary Applications	Electric Oven, Turntable Drive, Convection Fan
----------------------	--
