

Electric Oven

Electric oven designed for baking and roasting. It provides consistent heating for optimal cooking.

Product Overview

High-Performance Backup Power Solution

This high-performance sealed lead-acid battery is engineered for reliable power backup and energy storage in critical applications. Featuring a maintenance-free design, it offers a long service life and excellent discharge characteristics for consistent power output. Its robust construction ensures durability and safety, making it an ideal choice for UPS systems, emergency lighting, and security infrastructure.

Technical Specifications

Maintenance

Maintenance-Free

Battery Type

Sealed Lead-Acid

Applications

Primary Applications

- UPS Systems
- Emergency Lighting
- Security Systems
- Energy Storage

Performance

Performance Highlights

Long Service Life, High Reliability, Consistent Power Output, Robust Construction
