

Electric Paddle Mixer

This electric mixer is designed for mixing materials such as paint, mortar, and plaster. It features a robust motor, durable mixing paddle, variable speed settings, and an ergonomic handle.

Overview

Professional Electric Paddle Mixer

This high-performance electric mixer is engineered for consistent blending of construction materials, including paint, mortar, and plaster. Featuring a robust gearbox and a high-torque motor, it delivers reliable power for demanding mixing tasks. The tool is designed with user comfort in mind, incorporating an ergonomic handle and variable speed control for precise operation across different material viscosities.

Technical Specifications

No Load Speed

550 rpm
Max Speed

Power Output	1050 W
Voltage/Frequency	110-120V 50/60Hz
Max Mixture Volume	120 L
Max Paddle Diameter	120 mm
Tool Fitting/Clamp Thread	M14 X 2

Safety & Features

Operational Capabilities

- Variable speed control
- Safety on/off switch
- Continuous operation mode
- Integrated LED light for low-light conditions

Safety Features

Double Insulation, Class II Protection, Lock-on Switch, LED Work Light
