

Electric Paint Sprayer

This electric paint sprayer is designed for various painting and coating applications. It features an adjustable nozzle to control the spray pattern and flow rate, ensuring precise and even coverage.

Product Overview

Professional Electric Paint Sprayer

This versatile electric paint sprayer is designed for efficient coating applications without the need for an external air compressor. It features an adjustable nozzle that allows users to precisely control spray patterns and flow rates for even coverage on various surfaces. Built with an ergonomic design to minimize fatigue, this tool is durable and suitable for both professional projects and intensive DIY tasks.

Performance Metrics

Power Source	Electric
Key Features	Adjustable Nozzle, Ergonomic Design, Detachable Container, Compressor-Free
