

Electric Pallet Jack for Material Handling

This electric pallet jack is designed for efficient material handling in warehouses and industrial environments. Its compact design allows for maneuverability, and it features an AC motor, ergonomic handle with intuitive controls, and durable construction.

Overview

Efficient Material Handling Solution

This electric pallet jack is engineered for high-efficiency material handling in demanding warehouse and industrial environments. It features a compact design that ensures excellent maneuverability in tight spaces, paired with a powerful AC motor for reliable performance. Equipped with an ergonomic handle and intuitive controls, it allows operators to transport palletized loads with precision and minimal physical strain.

Performance Metrics

Key Performance Metrics

1500 Kg

Load Capacity

6 Km/h

Travel Speed

1400 mm

Turning Radius

Dimensions & Forks

Fork Specifications

Metric	Value
Minimum Height	80 mm
Lifting Height	200 mm
Fork Size Options	680x1220mm or 550x1150mm

Power & Electrical

Power System

- Driving Motor: AC24V/700W
- Lifting Motor: DC24V/1300W
- Battery: DC2x12V/120Ah
- Charger: Portable AC220V 24V/150A

Physical Attributes

Physical Specifications

- Overall Weight: 380 Kg
- Overall Dimensions: 1640x718x1321 mm
