

Electric Pallet Stacker AGV for Material Handling

The Electric Pallet Stacker AGV automates material handling with precision and safety. It is designed for efficient pallet lifting and transport in warehouses, manufacturing plants, and distribution centers.

ADDITIONAL IMAGES

Overview

Automated Material Handling Solution

This Electric Pallet Stacker AGV is designed for efficient and safe material handling in industrial environments. Featuring a robust chassis and precise navigation capabilities, it automates pallet transport to optimize workflow and reduce labor costs. The electric drive system ensures quiet, emission-free operation, while integrated safety sensors and obstacle detection systems guarantee a secure working environment.

Operational Features

Safety Systems

- Integrated Safety Sensors
- Emergency Stop System
- Collision Prevention

Key Capabilities

Pallet Stacking, Automated Navigation, Obstacle Detection, Electric Drive, Programmable Routing

Industry Applications

Supported Industries

Industry Sector

Construction Machinery Manufacturing

Automotive Manufacturing

Intelligent Warehousing

Electronic Equipment Manufacturing
