

Electric Pallet Truck 1500kg Capacity

This electric pallet truck is designed for efficient horizontal transport of palletized goods. It features a compact chassis for maneuverability and an ergonomic tiller head for comfortable operation.

ADDITIONAL IMAGES

Overview

Efficient Material Handling Solution

This electric pallet truck is engineered for the efficient horizontal transport of palletized goods in warehouses, distribution centers, and manufacturing facilities. Featuring a compact chassis design, it excels at maneuverability in confined spaces and tight aisles. The unit combines a robust 1500 kg load capacity with an ergonomic tiller head, ensuring both high performance and operator comfort during daily tasks.

Performance Metrics

Load Capacity

1500 kg
Capacity

Drive System

Maintenance-free AC drive motor

Braking Systems

Automatic braking, Regenerative braking

Operation & Safety

Safety Features

- Emergency stop button
- Proportional speed control
- Automatic braking system

Control Interface

Ergonomic tiller head

Power & Maintenance

Maintenance Level

Low Maintenance • Accessible Components

Power System

Integrated battery and charger system

Applications

Typical Applications

- Loading and unloading trucks
- Warehouse horizontal transport
- Order picking
