

Electric Pallet Truck, 2000kg Capacity

Electric pallet truck has a 2000kg capacity. Designed for efficient and safe material handling in warehouses and distribution centers, it features a compact design and an ergonomic control handle.

Overview

Efficient Material Handling Solution

This electric pallet truck is engineered for high-performance material handling in demanding warehouse and distribution environments. With a robust 2000kg capacity, it offers the strength needed for heavy-duty tasks while maintaining a compact footprint for superior maneuverability in tight aisles. Designed with operator comfort in mind, the unit features an ergonomic control handle that ensures precise, fatigue-free operation throughout the workday.

Performance Specifications

Load Capacity

2000 kg

Max Load Capacity

Model Reference	CBD20R
Reference ID	42000

Design Features

Design Characteristics	Compact Design, Ergonomic Handle, Warehouse Optimized
